

Hannah Wilcoxson

Qualifications/Training: First Class BSc (Hons) Pre-Registration Nursing (Mental Health)

Professional Body: NMC

Years in NHS: 3

Years in Private Healthcare: 3

Hannah graduated from the University of Central Lancashire in 2017, commencing her first nursing role with St Andrew's Healthcare within the forensic inpatient environment. Following a change in location, she began working as a Senior Staff Nurse within a step-down community setting for people with learning disabilities and complex mental health needs. During this time she assisted with service development within the Transforming Care Programme. This work also involved working with the management team and commissioners to enhance care plans, risks assessments and Mental Capacity Assessments, in order to promote independence of service users.

Hannah later commenced the role of Community Mental Health Practitioner, working with individuals of adult age requiring support with severe and enduring mental health needs. This role allowed her to complete training in Behavioural Family Therapy and EMDR to provide further care and treatment.

Hannah began her role as Senior Clinical Quality Officer with 360 Assurance in January 2023 and is keen to use her knowledge and experiences to enhance patient safety and care.
